

## **Protagenic Therapeutics to Present at the BioContact 2008 Symposium**

New York - September 22, 2008 - Protagenic Therapeutics., Inc. announced today that it will present at the BioContact 2008 symposium at the Chateau Frontenac in Quebec City. The presentation will be given by David A. Lovejoy, Ph.D., Chief Scientific Officer, October 3, 2008 in the Place Bellevue room at 10:30 a.m. Eastern Time.

Dr. Lovejoy will provide an overview of the company Research and Development programs, including PT00114 (a natural peptide hormone), which plays a key role in regulating depression, anxiety and other stress-related disorders.

### **About BioContact 2008**

BioContact is a partnership symposium gathering over 1200 participants. More than 150 biopharmaceutical companies located in Canada, United States, Asia and Europe will be presenting in different sectors including cancer, cardiology, drug delivery and genomics/proteomics. For more information visit the BioContact website at [www.biocontact.qc.ca](http://www.biocontact.qc.ca).

### **About Protagenic Therapeutics**

Protagenic Therapeutics has created a proprietary portfolio of novel neuropeptides, which are in various stages of development and preclinical evaluation for the treatment of neuropsychiatric and other disorders. Novel peptide targets may also have potential applications in the areas of neuroprotection, spinal cord injuries and trauma.
